

Syed Monis Sarwar

monissms16@gmail.com — m0nis.com — github.com/MonisMS — linkedin.com/in/syed-monis-sarwar-sms47

Full-stack engineer. Strong backend and data bias. Ships AI-native apps end to end.

EDUCATION

Babu Banarsi Das Institute of Technology and Management <i>Bachelor of Technology in Computer Science and Engineering</i>	Uttar Pradesh, India 2024 – 2028
Anand Bhawan School <i>Senior Secondary (Class XII)</i>	Uttar Pradesh, India 2022 – 2023

PROJECTS

AskAI — Personal AI Assistant <i>TypeScript, Next.js, OpenAI Realtime API, Stream Video SDK, Drizzle ORM, Neon, Inngest, Vercel</i>	Live GitHub
– Built a production AI assistant handling real-time Q&A over documents and meetings via OpenAI Realtime API, with structured outputs and LLM failure-mode handling. – Implemented low-latency audio/video streaming with Stream Video SDK; added end-to-end observability using OpenTelemetry to monitor LLM pipeline behavior in production. – Orchestrated background workflows and webhook pipelines with Inngest; deployed on serverless Postgres (Neon) with Drizzle migrations and Vercel edge functions.	
Curio — Personalized Content Aggregator <i>TypeScript, Next.js, PostgreSQL, Drizzle ORM, Shadcn/ui, Vercel</i>	Live GitHub
– Built a full-stack content platform ingesting 275+ sources (RSS, HN, Reddit, YouTube) with parallel per-source fetching, per-source timeouts, and fault isolation. – Implemented ML-based quality ranking across 26 topic categories to surface high-signal content over recency or virality. – Built a timezone-aware email digest system with configurable daily/weekly delivery and HMAC-signed unsubscribe links.	
Nivora — Autonomous Civic Grievance Agent <i>TypeScript, Next.js, OpenAI GPT-4o-mini, Whisper, Neon, Drizzle ORM, Resend</i>	Live GitHub
– Built an autonomous AI agent that classifies citizen grievances, routes them to the correct department, and auto-escalates with a re-drafted complaint when SLA deadlines are missed. – Integrated GPT-4o-mini for complaint classification and Hindi generation; Whisper for voice transcription enabling multilingual (Hindi/English) input. – Designed deterministic SLA tracking with automated email escalation via Resend and a public transparency dashboard showing per-department compliance rates.	

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL
Frontend: React, Next.js, Tailwind CSS, TanStack Query
Backend: Node.js, Bun, Inngest, Redis/BullMQ
AI & LLM: OpenAI API, Whisper, Vercel AI SDK
Databases & ORMs: PostgreSQL, Drizzle, Prisma, Neon, Supabase
Infrastructure: Docker, Vercel, Resend
Tooling: Git, pnpm, Vitest
